Summary

Detail-oriented Computer Science Engineer with 2+ years of experience building scalable, high-performance back-end systems. Skilled in end-to-end development, including designing features, implementing RESTful APIs, and optimizing production services for reliability and performance. Strong with Java, Spring Boot, SQL, microservices, Docker, and Kubernetes, with project experience in Python and computer vision. Collaborative contributor in Agile/Scrum teams with a focus on clean, maintainable code and thoughtful peer reviews.

Technical Skills

- **Languages:** Java, Python, SQL, JavaScript, C/C++, Linux, HTML/CSS, React, TypeScript
- **Backend & Frameworks:** Spring Boot, Django, Git, GitHub, NoSQL, Restful API
- **Data & ML Libraries:** Pandas, NumPy, OpenCV, MediaPipe
- **Tools & DevOps:** Docker, Kubernetes, Jenkins, CI/CD Pipelines, Postman, JUnit, AWS, Jira
- **Core Areas:** Backend Development, API Development, Microservices, Data Engineering, Computer Vision, Object-Oriented programming, data structures and algorithms, Software Engineering, AI/ML, Debugging, Operating Systems
- **Soft Skills:** Teamwork, Communication Skills, Analytical decision-making, Agile Methodology, Quick Learner, Curiosity, Willingness to learn, Problem-Solving

Experience

California State University, Long Beach

Feb 2026 - Present

Software Developer Student Assistant

- Built a phishing email detection system using Python and FastAPI with a Human-in-the-Loop workflow.
- Implemented LLM-based classification with confidence score(logprobs) to improve prediction reliability.
- Deployed and managed the application on Microsoft Azure.

HSBC Bank

Aug 2023 - Jul 2025

Associate Software Engineer

India

- Developed and maintained Java / Spring Boot microservices with SQL-based data handling.
- Designed, implemented, and maintained secure banking REST APIs.
- Built data ingestion workflows and improved reliability through unit testing and regression testing.
- Migrated applications to AWS, managed CI/CD pipelines, and containerized services using Docker.
- Collaborated with cross-functional teams in an Agile/Scrum environment and optimized performance across multiple environments.

Projects

Supermarket Management System

- Tech Stack: HTML, CSS, JavaScript, Java, Spring Boot, MySQL, REST APIs
- Designed core entities (User, Category, Product) and integrated backend APIs to fetch and display application data.
- Implemented search with autocomplete and category-based filtering to improve product discovery and navigation.
- Built a user-friendly interface and optimized browsing performance for a smoother experience.
- Skills Used: Java, Spring Boot, MySQL, REST API Development, JavaScript, Web Development

Virtual Mouse Using Fingertips

- Tech Stack: Python, MediaPipe, OpenCV, PyAutoGUI
- Built a computer vision system to capture and interpret hand landmarks and gestures for hands-free cursor control.
- Mapped finger gestures to mouse actions (left/right click, drag-and-drop, zoom) using noise filtering for stability.

Publications

- Springer, 2025.SharPy: Hands-Free Digital Drawing with Air Writing and Gesture Recognition.<https://doi.org/10.1063/5.0286191>

Education

California State University, Long Beach

Aug 2025 - May 2027

Master of Science, Computer Science

Long Beach, CA

- GPA: 3.5

MediCaps University

Aug 2019 - 2023

Bachelor of Technology, Computer Science and Engineering

India

- GPA: 3.88
